

FACT SHEET

**U.S. Army Joint Munitions Command (JMC)
Rock Island, Illinois 61299-6000**

**Tooele Army Depot
Tooele, Utah 84074-5000**

MISSION:

Tooele Army Depot (TEAD) is a premier active joint ammunition storage site. Tooele is responsible for shipping, storing, receiving, inspecting, demilitarization, and maintaining training and war reserve conventional ammunition. Tooele's Ammunition Equipment and Manufacturing Directorate (AEMD) designs and manufactures ammunition peculiar equipment (APE) used in maintenance and demilitarization of munitions for all of the Department of Defense (DoD).

HISTORY:

TEAD was established in 1942 in an area with a historical tradition of Indian cultures. Early Desert Archaic Indians inhabited the Tooele Valley and probably some portions of the Depot some 11,000 years ago. The Goshute people, who currently inhabit reservations in the surrounding area, are descendants of the Numic-speaking culture.

Construction of the TEAD facilities was completed in 1943. Originally the north area was known as the Tooele Ordnance Depot, which functioned as a storage depot for World War II supplies, ammunition, and combat vehicles. In 1949, TEAD assumed command of the Desert Chemical Depot until recently known as TEAD South Area. In 1962 the depot was redesignated the Tooele Army Depot. Since that time the depot has been assigned maintenance mission responsibilities for topographic equipment, troop support items, construction equipment, generators, and various types of tactical wheeled vehicles. Since 1964, TEAD assumed command and control of the non-tactical generator rail, equipment repair facility located at Hill Air Force Base, Ogden, Utah.

BRAC 1988 recommended that TEAD take over the general supply storage mission from Pueblo Army Depot Activity, Colorado, and BRAC 1993 recommended TEAD eliminate its troop support, maintenance, storage, and distribution missions. The realignment of the maintenance and supply missions was completed in 1995.

Since the 1993 BRAC decision that the TEAD mission be reduced, the Army has completed the first (of its type) Transfer of Fee Title of the surplus property to the Redevelopment Agency of Tooele City (RDA). On January 19, 1999, the U.S. Army Material Command, Chief of Staff, Major General Normal E. Williams, presented a

ceremonial deed commemorating the transfer of 1700 acres and 258 buildings to Tooele City. This process was completed three years earlier than programmed.

On September 28, 1999, another mark in Tooele Army Depot history took place. Once again the mission of the Defense Non-Tactical Generator and Rail Center (DGRC), command and control, transferred to another command – U.S. Army Tank-Automotive and Armaments Command (TACOM), Warren, Michigan.

On March 1, 2010, TEAD was designated as a Center of Industrial and Technical Excellence for Ammunition Peculiar Equipment by the Secretary of the Army. Certifications for ISO 9001:2008, 14001 and OHSAS 18001 were also received.

On July 11, 2013, Deseret Chemical Depot (DCD) officially closed and transferred facilities and property, approximately 19,000 acres to Tooele Army Depot. Again identified as Tooele Army Depot, South Area.

BRANCH:	Army
LOCATION:	Tooele County, Tooele, Utah
FACILITIES:	
SIZE:	24,000 acres
BUILDINGS:	181
IGLOOS	902
STORAGE CAPABILITY:	2.5 million sq ft

ECONOMIC IMPACT FISCAL 2014:

OPERATING BUDGET:	\$65.8 million
PAYROLL:	\$39.5 million

EMPLOYMENT LEVEL:

CIVILIAN:	489
MILITARY:	2
CONTRACTOR:	47
TENANTS	95

PEAK EMPLOYMENT:

YEAR:	1985
EMPLOYEES:	4,697
